- ① Using a T30 torx tool, remove the (2) fasteners that hold the voltage regulator in place.

- ③ Use the exploded view above as a guide for assembly. The two OEM spacers are important, so place them as shown above!

- ④ We recommend holding the assembly together as shown then, using a 4mm allen tool, tighten the (2) M6s. Tighten firmly, do not crank on these!

- ① Using a T25 torx tool, remove the (2) fasteners that hold the OEM voltage regulator guard in place. You no longer need these fasteners.

- ② Using a T30 torx tool, remove the (2) fasteners holding the voltage regulator in place. You no longer need these fasteners.

- ③ Use the exploded view above as a guide for assembly. Exploded view is of F800 but TR650 install order is identical with the exception of the oem spacers (a), these are not used. Using a 4mm allen tool, tighten the (2) M6s.

- ④ Install the (2) M5 x 12 Torx screws with (2) M5 washers into now empty holes on OEM bracket using a T25 driver (a). Tighten all the way.
