

Baja Designs | Enduro Kit Reference Chart

Stator Modifications:

Baja Designs offers a stator modification (ground float) that they will perform for you at an additional cost. Detailed instructions are included with the kit if you would like to complete this modification yourself. For more information please contact Baja Designs.

NOTE: These kits will only work with bikes that come stock with a lighting coil or can be modified to produce lighting power. Some bikes will require a stator wind or an aftermarket stator assembly to run any lighting. This Application Chart will tell you if your bike needs anything other than the lighting kit and shows the Baja Designs part and part number that are required for proper installation. For more information please contact Baja Designs.
