

Preparation

Remove the original handguards (if fitted). For the Tenere, also remove original bar end weights.

Note:

BMW R1100GS / R1150GS:

Items (9) and (10) are not required.
 Fit backbone (1) directly to original bar end weight with bolt (8).

YAMAHA Tenere:

When fitting to Tenere you may need to adjust the handlebar position back or forward a little to clear fairing and tank when the steering is at full lock.

Bar Side View

Important Fitting Procedure

Loosely assemble the clamp to the handlebar as per diagram. Attach the handguard with applicable parts to the handlebar end and also to the clamp connector (3).

Position backbone so it is horizontal when viewed from the side and tighten bolt (8).

The clamp bolts must be tightened in the following order:

Tighten bolt (7) through the aluminium bar (1) to the clamp connector (3) of the clamp assembly.

Tighten bolt (4) to solidly lock the swivel section (3) between the clamp saddles (2).

Tighten bolt (5) to secure the clamp assembly firmly to the handlebar.

Note: The clamp is designed to allow the nut on bolt (4) to pull into the recessed hole. This eliminates the need for a wrench after the bolt starts to tighten.

Guard options sold separately

JET JET-003

VPS VPS-003

Storm STM-003

CARBON BCF-003

1 Aluminium Bar

PN: BAR-V-040
Pcs. 1 Left & 1 Right

2 Clamp Saddle

PN: CS-STD
Pcs. 4 pieces

3 Swivel 60mm

PN: CP4
Pcs. 2

4 Socket Head Bolt 25mm

PN: M6x25SHCSZP
Pcs. 2

5 Socket Head Bolt 30mm

PN: M6x30SHCSZP
Pcs. 2

6 Nylock Nut

PN: M6LN
Pcs. 4

7 Button Head Bolt 25mm

PN: M8x25BHCSZP
Pcs. 2

8 Flat Head Bolt 40mm

PN: M8x40FHCSZP
Pcs. 2

9 Bolt

PN: BESF2
Pcs. 2

10 Bar End Weight

PN: BEW-35
Pcs. 2

Recommended Torque Settings	
M6	10 Nm (7.4 lbf ft)
M8	20 Nm (14.8 lbf ft)

CAUTION:

Installation of the handguard is safety-relevant work and can be complicated. We recommend the installation be performed by a motorcycle service technician. Rideworx accepts no liability for damages caused by improper mounting. All screws, bolts and nuts, including all replacement hardware provided by Rideworx, should be tightened to the torque specified in the below table. After the first 50km of riding check all screws, bolts and nuts are tightened to the correct torque. We recommend a medium strength liquid thread lock product on all fasteners.

WARNING:

It is important there is a working clearance (approx 3mm) between the throttle grip end and the handguard to ensure a free closing throttle. Check operation of all handlebar controls, specifically the throttle, front brake, kill switch and clutch to ensure they are operating correctly and are in accordance with the OEM specifications. Do not ride the motorcycle if any controls are not operating correctly. Check periodically that all bolts are tight.

Disclaimer:

A failure to follow these fitting instructions could cause serious injury, death or property damage. These handguards are intended solely for use with motorcycles/ATV/snowmobiles/scooters that have not been modified. They are not designed to prevent injury or death while riding or in an accident or crash. The user must ensure that all controls are free of the handguards every time that they ride. By installing and/or using this product you acknowledge that you accept these terms and have followed the fitting instructions.
