Before mounting this product clean the vehicle thoroughly.

**Note!**
When working on this product, always see the Vehicle Service Manual for vehicle specific procedures and important data.

1
Put the motorcycle on a workstand so that the rear wheel barely touches the ground.

2
Loosen and remove the original shock absorber.

3
Install the Öhlins shock absorber in the same way as the original shock absorbers. The fill screw pointing towards the rear.

**Note!**
Lower the vehicle so that the suspension is slightly compressed before tightening the screws.

**Caution!**
Ensure that all screws are tightened to the correct torque and that nothing fouls or restricts movement of the shock absorber/front fork/steering damper when the suspension is fully compressed or extended.
Warning!
Before riding, always make sure that the basic settings made by Öhlins are according to recommended Setup Data. Read about adjustments and setting up in the Öhlins Owner’s Manual before you make any adjustments. Contact an Öhlins dealer if you have any questions about setting up.
