POWER VISION
DYNOJET

INTRODUCTION

POWER VISION OVERVIEW—FRONT VIEW

POWER VISION OVERVIEW—SIDE VIEW

Thank you for purchasing the Power Vision from Dynojet Research. The Power Vision is the device to interface between your computer and vehicle ECU allowing you to tune your stock ECU to achieve optimal performance from your vehicle.

Use the buttons to navigate the device menus, make selections, cycle through the four available gauge screens, and log data. Connect to the diagnostic port to flash a tune; use the USB connection to interface between the Power Vision and your computer.

For state of the art technical support, please visit www.dynojet.zendesk.com.

INSTALLING THE POWER VISION

INSTALL POWER VISION

DIAGNOSTIC PORT

1 Secure the Power Vision to the vehicle using the supplied Velcro. Make sure the Power Vision will not interfere with the operation and steering of the vehicle.

Note: The Power Vision does not need to be mounted to the vehicle.

2 Attach the diagnostic cable to the diagnostic port on the Power Vision and to the diagnostic port on the vehicle.

Ranger Models: located under the seat.

RZR Models: located under the front cover near the coolant reserve bottle.

RZR PRO XP Models: located under the steering wheel.

GETTING STARTED

Use the Tune File Wizard to prepare your Power Vision device with the stock (.stk) and tune (.djt) files needed to flash your vehicle.

- 1 Connect the Power Vision to the vehicle.
- 2 Turn the key on. The Power Vision will scan for files.
 - There are three possible file states:
 - File State 1:** No compatible tune or stock files.
 - File State 2:** No compatible tune files.
 - File State 3:** All required files found.
- 3 Gauges are displayed.

Connect the Power Vision to the vehicle diagnostic port to collect ECU information. Turn the key on.

File State 1:
Press the **Enter** button for ECU read to begin the tuning process. This process takes about fifteen minutes.

File State 2:
Go to www.dynojet.com/pvtunes to download tune files.

File State 3:
All required files found. The Power Vision is ready to flash a tune to the connected vehicle.

FLASHING YOUR VEHICLE

The Power Vision must be paired to the connected vehicle ECU to function properly.

Note: Once paired to the vehicle ECU, the Power Vision will not work on another vehicle without purchasing a tune license.

- 1 From the Main Menu, select **Flash Tune**.
- 2 Select the tune file (.djt) and press **Enter** to view the Tune Info.
 - Note:** The Dynojet tune file (.djt) is a tune file which is different (better than stock performance or the necessary file when bolting on an exhaust, for example); the stock file (.stk) is the direct duplicate of what the OEM shipped.
- 3 Press **Enter** to accept the tune and pair the Power Vision to the vehicle.
 - Note:** Pair to vehicle will only happen on the first flash.
- 4 Press **Enter** to pair and lock the Power Vision to the ECU and to begin the flash. Do not turn off the key switch or disconnect the Power Vision during the flash.
- 5 After the flash is complete, turn the key off and wait 45 seconds before turning the key back on to start.

VIEWING THE VEHICLE INFORMATION

This menu allows you to view the device status (paired/not paired), VIN #, Model ID, ECU serial number, tune compat, and checksum compat.

Select **Vehicle Tools > Vehicle Information**.

VIEWING THE DIAGNOSTIC CODES

This menu allows you to read and clear diagnostic trouble codes.

- 1 To read codes, select **Vehicle Tools>Diagnostics>Active Codes**.
- 2 To clear codes, select **Vehicle Tools>Diagnostics>Clear Codes**.

READING THE ECU

This menu allows you to read the ECU. This process takes about fifteen minutes.

Select **Vehicle Tools>Read ECU**.

RESTORING THE ECU

This menu allows you to restore the ECU. Use Restore ECU if the device does not complete the flash or if your vehicle will not start.

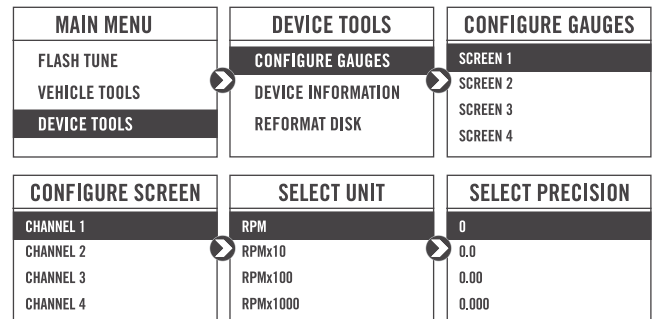

Select **Vehicle Tools>Restore ECU**.

CONFIGURING GAUGES

This menu allows you to configure up to four different gauge screens. Each gauge screen has four configurable channels.

- 1 From the Main Menu, select **Device Tools>Configure Gauges**.
- 2 Select a gauge screen and press **Enter**.
- 3 Select a channel and press **Enter**.
- 4 Select a channel from the list and press **Enter**.
- 5 Select the precision or units for that channel and press **Enter**.
- 6 Continue setting up the remaining channels as desired.
- 7 Continue configuring the remaining gauge screens as desired.

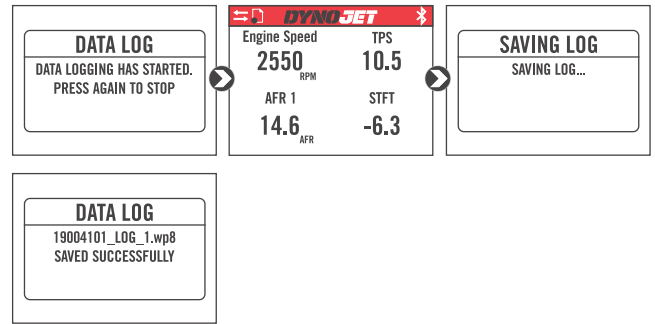

LOGGING DATA

1 Press the **Log** button to begin logging. The Power Vision screen will illuminate a bright red banner across the top when logging.

2 Press the **Log** button again to stop logging.

3 Use the Power Core software to view log files.

Snapshot Log: Press and hold the **Log** button for two seconds to record the previous two minutes of operating time.

DELETING DATA LOGS

This menu allows you to delete data logs.

1 Select **Vehicle Tools>Delete Data Log**.

2 Select a specific log to delete or select ***Delete All Logs***.

VIEWING THE DEVICE INFORMATION

This menu allows you to view the device firmware version, serial number, and stock code.

Select **Device Tools>Device Information**.

REFORMATTING THE DISK

This menu allows you to reformat the disk and erase all data.

Select **Device Tools>Reformat Disk**.

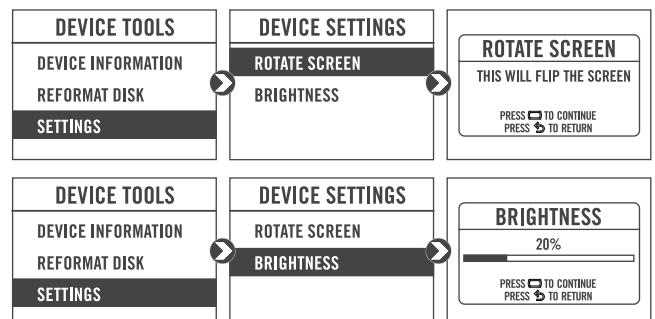

CHANGING THE SETTINGS

This menu allows you to rotate the screen allowing you to change the orientation of the Power Vision device along with adjusting the screen brightness.

Select **Device Tools>Settings>Rotate Screen** to flip the screen.

Select **Device Tools>Settings>Brightness** to change the screen brightness.

UPDATING THE DEVICE

This menu allows you to update the device with the latest firmware.

- 1 Go to www.dynojet.com/PowerVision.
- 2 From the top navigation menu, select **Support>Downloads**.
- 3 Select **Power Vision 3**.
- 4 Download the Power Vision 3 Firmware for Polaris.
- 5 Save the file to your device.
- 6 Select **Device Tools>Update Device**.

EXPORT DIAGNOSTICS

This menu allows you to create a BIN file containing device information used by Dynojet Tech Support.

- 1 Select **Device Tools>Export Diagnostics**.
- 2 If requested by Dynojet Tech Support, connect your Power Vision to a computer and email the BIN file to PV3tech@dynojet.com.

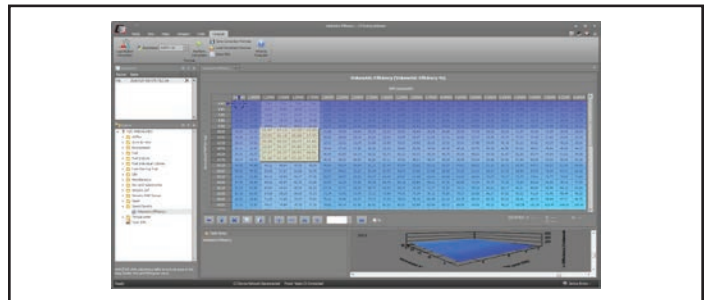

INSTALLING THE POWER CORE SOFTWARE

Download the Power Core software and take tuning to a whole new level.

Note: Downloading the Power Core software is optional and not necessary to use the Power Vision.

- 1 Go to www.dynojet.com/PowerVision.
- 2 From the top navigation menu, select **Support>Downloads**.
- 3 Select **Power Vision CX** from the drop-down menu.
- 4 Download the Dynojet Power Core software.
- 5 Double-click the saved file to begin installation. Follow the on-screen prompts. Refer to the Power Core Help for more information.
